The compounding effects of THC and CBD work together to provide greater medical relief to the user. This is because THC and CBD bind to different cannabinoid receptors and in turn generate higher endocannabinoid activities. With cannabis and cannabis-related products becoming more available to the general public, it’s important to understand how the medical compounds within the products interact with your body at a biochemical level.

Pharmaceutical companies are currently working on creating cannabinoid-specific medicine. This means that they focus on either CBD or THC as the base of their medicine.

However, the cannabis community has long been raving about “whole plant medicine” - and for good reason. Cannabinoids work together to provide a higher degree of medical relief. This process is better known as the Entourage Effect or the Net Effect.

Our plant-powered organic skin & healing products deeply nurture & help you achieve healthy, radiant skin, and relief from pain.

Our patented base blend is a mixture of 12 oils that, in conjunction with each other, have the highest healing, anti-fungal, anti-inflammatory, antioxidant properties. This blend has been tested and patented for the utmost quality and relief in one bottle, and will be the base/healing blend that goes into every single one of our rubs: Vitamin E Oil, Ginger, Turmeric, Copaiba, Sweet Almond Oil, Shea Butter, Mango Butter, Cocoa Butter, Coconut Oil, Beeswax, Cinnamon Oil, and Hemp Oil.

All our ingredients are 100% Organic Certified. The hemp we use is tested before and after extraction and is organically grown. We do 100% finished-product batch testing for quality and potency and post this result on our website. Batch samples will always have a different Cannabinoid profile. Read Cannabis 101: Drug Medicine or Miracle? Healing - Our patented base blend with scents of your choice. Topical that works great for almost everything. We offer this in Lavender, Manly Man, and Rose.

Back and Muscle - Perfect for treating sore and aching muscles, with the patented base blend and special essential oils that are tailored to healing sore muscles. This balm brings relief to your body where it is needed most, also helps with inflammation and has high antioxidant properties.

Migraine Mix - Specially created mix of essential oils, with our patented base blend to help soothe your aching head. The blend is a wonderful smelling treatment for any type of headache.

Arthritis and Nerve - A special mixture of essential oils with our patented base blend that contains a mild sedative effect that helps bring on relaxation and relieve tension. And, it also has anti-inflammatory properties, which make it a good essential oil for topical application to painful areas. The analgesic properties are what offer the greatest amount of relief to people enduring nerve pain.

Energy - A special uplifting blend, for when you need it, made with our patented base blend and a special mix of invigorating scents, this will help just when you are feeling down.

Sinus and Congestion - Potent essential oils mixed with our patented base blend, to relieve the worst symptoms of hay fever, runny nose, congestion, and sneezing.

Calming Night - Our most extensive blend of essential oils with our patented base blend to help you relax and sleep, a wonderful scent will instantly relax your mind and calm any aches that you may have.

Mood Massage - Unique blend for those times you may need a little boost to “get you in the mood.” Made with our patented base blend and mood-enhancing essential oils, this is definitely a winner for both of you!

Please log on to: GreenHealthHolistic.com and fill out our petition for cannabis research. Take cannabis off of Schedule One and make it Priory One! Thank you again!

You have a story to tell? We have already started Volume Two of testimonials! Contact us through the website and please share!

Please download our book: Cannabis 101: Drug, Medicine, or Miracle. Testimonials and Facts!

**Vitamin E** - Important to immune function. Plays a role in cardiovascular health. Protects the body against toxins. Plays a role in liver detoxification, and counteracts the effects of other antioxidants. Necessary for normal calcium metabolism. Aids wound healing and helps reduce scar formation. Plays essential role in the cellular respiration of all muscles, including the heart. The nutrient makes it possible for muscles and nerves to function with less oxygen, thereby increasing their endurance and stamina.

**Hemp Oil** - Hemp seed oil has many positive effects on the skin, it alleviates skin problems such as dryness and those related to the aging process. It has been shown to be useful in treating symptoms of atopic dermatitis. Skin studies have shown that hemp seed oil alleviates symptoms of Lupus erythematosus.

**Sweet Almond Oil** - Contains vitamin A, B1, B2, B6 and small amounts of vitamin E. It has antioxidant capability. Antioxidants protect vital cell structure by neutralizing free radicals. It has been shown to decrease the effects of psoriasis, erythema, and help reduce the effects of skin cancer.

**Coconut Oil** - Prevents dryness and flaking of skin. Helps in treating various skin conditions including psoriasis, dermatitis, eczema, and other skin infections. Coconut oil has also been known to help in preventing premature aging, and degenerative disease due to its well-known antioxidant properties.

**Shea Butter** - Traditional use of shea butter is to ease skin irritations, psoriasis, eczema, and sunburn. The oil soluble components are unsaponifiable, which in turn mean this substance has a greater healing potential for the skin. Shea butter has proven in clinical studies that it has anti-inflammatory benefits. But one compound has (lupene cinnamate) has also prevented tumor development in animal studies. The anti-inflammatory benefits but one compound has (lupene cinnamate) has also prevented tumor development in animal studies.

**Cocoa Butter** - Cocoa is high in antioxidants, which help fight off free-radical damage to the skin. Free radicals can cause skin aging, dark patches, and dull skin. Protecting your skin from free-radical damage is crucial to keep it healthy and youthful-looking. Cocoa butter is also an anti-inflammatory—just another way it helps your skin withstand the passage of time.

**Turmeric** - One of the common benefits of ginger and turmeric, and reason enough to include them both in your diet, is their antioxidant content. Think of antioxidants as a microscopic molecular army. When they detect the presence of reactive compounds called free radicals—"invaders" that age your cells and contribute to cancer—they neutralize the compounds to fight cellular damage. Both turmeric and ginger contain powerful antioxidant compounds (curcumin for turmeric, gingerol for ginger) that benefit your health.

**Ginger** - If you’ve ever turned to ginger tea or ginger ale to soothe your stomach during a flu, you already know a little bit about one of ginger’s main benefits: its anti-nausea properties. Researchers have studied ginger’s benefits for soothing nausea in cancer patients receiving chemotherapy and for pregnant women. Ginger helps in both cases, although more research is needed to know exactly how well it works. Ginger might also offer benefits for reducing nausea from motion sickness, but the research so far has yielded conflicting results.

**Copaiba** - Respiratory support. It’s very gentle in its actions and very effective. It is a personal favorite, for supporting healthy respiratory functions. Each time I, or my kids, have cough, I add a drop or two to a tablespoon of carrier oil mix it and apply as a rub on a chest area to help our body naturally deal with the cough. Healthy skin support. Copaiba essential oil is known to have astringent qualities (due to its chemistry) which makes a great addition to your skin care routine. It may help the skin to look firmer and tighter in a natural way. Can also be beneficial to use for helping to reduce the appearance of scars and to improve the appearance of a saggy skin on a long-term use. Pain relief support. Naturally high in b-caryophyllene compound which is known to have anti-inflammatory, antispasmodic and analgesic properties Copaiba is also great to be used with traumas, joint pains, muscle pains, headaches. Immune system support. Coming back to the main compound b-caryophyllene which is known as immunostimulant. Diffusing copaiba essential oil is good for naturally boosting our immune system.

**Cinnamon Oil** - Helps with arthritis, menstrual cramps, yeast infections, common colds and flu, respiratory problems, skin infections, heart disorders, antibacterial properties, anti-fungal, antimicrobial, circulation, anti-inflammatory, relieves pain, stops bleeding.

**Grapeseed Oil** - It is known for its anti-inflammatory, antimicrobial and antioxidant properties. These properties with the high amounts of omega fatty acids and vitamin E have made it a great topical treatment for many conditions. It has proven microbial properties which makes it great for acne treatments. It also has proven properties that help with skin elasticity, helps even out skin tone, and protects from sun damage.

**Hemp Oil** - Hemp seed oil has many positive effects on the skin, it alleviates skin problems such as dryness and those related to the aging process. It has been shown to be useful in treating symptoms of atopic dermatitis. Skin studies have shown that hemp seed oil alleviates symptoms of Lupus erythematosus.

**Sweet Almond Oil** - Contains vitamin A, B1, B2, B6 and small amounts of vitamin E. It has antioxidant capability. Antioxidants protect vital cell structure by neutralizing free radicals. It has been shown to decrease the effects of psoriasis, erythema, and help reduce the effects of skin cancer.

The oil soluble components are unsaponifiable, which in turn mean this substance has a greater healing potential for the skin. Shea butter has proven in clinical studies that it has anti-inflammatory benefits. But one compound has (lupene cinnamate) has also prevented tumor development in carcinogenesis tests.

**Mango Butter** - This natural ingredient is emollient, softening, and soothing to the skin along with highly oxidative ability, wound healing, and regenerative activity. The various benefits of mango butter include dry skin and rash treatment, blemishes and wrinkle clearance, itch and sunburn healing, wound and crack healing, relief from insect bites, and treatment of eczema and dermatitis.

**Turmeric** - One of the common benefits of ginger and turmeric, and reason enough to include them both in your diet, is their antioxidant content. Think of antioxidants as a microscopic molecular army. When they detect the presence of reactive compounds called free radicals—"invaders" that age your cells and contribute to cancer—they neutralize the compounds to fight cellular damage.
